

## ADDITIONAL RESOLUTION

---

Adopted September 11, 2020

**2020.B.4.** The Board is excited about the potential for scientific discoveries enabled by MAROON-X. To facilitate and promote the use of the instrument by the entire Gemini community, the MAROON-X team will provide documentation, open-source reduction pipelines, and observing/data reduction/calibration support for community data. In exchange, the team will be granted an un-competed 150-hour LLP over three semesters starting in 2021A. To demonstrate and advertise the instrument capabilities amongst the community at large, the Board encourages the team to consider releasing some of the LLP data to the community before the end of the standard 1-year proprietary period.
