## **Journey through the Universe 2016 Starlabs**

2016 will be a special year for Journey through the Universe and its K-1 students! From January through May 2016, Astronomy Educators will visit schools with Gemini's own Starlab, an inflatable, portable planetarium. Learning outcomes of this ongoing event could (depending on teacher's requests) include:

- Celestial daily motions
- Distances within our solar system
- An overview of planetary atmospheres
- Celestial bodies within our solar system and their individual environments
- Hawaiian folklore in Astronomy
- Constellations
